Tow Bar Kit
Fitting Instructions
General Notes

Read through the fitting instructions before installation of accessory. Install tow bar as described. Do not use any other mounting location/method other than described in this instruction. Failure to do so may cause damage to the vehicle or the accessory.

- It is advisable to seek assistance of another person when installing this product.
- Do not repair or modify the tow bar and/or its mounting bracket in any way. Repairs or modifications may affect the operation of the tow bar which may result in serious injury or death.
- Do not remove the label from the tow bar or tongue.
- If the Tongue is removed from the tow bar, ensure that it is stored securely within the vehicle. Injury and or damage may result if the Tongue is free to move about within the vehicle.
- Before refitting the Garnish, fit the trailer wiring harness (needs to occur after towbar is installed).
- It is always recommended that this accessory is fitted by a qualified Toyota Technician.
- Safely store and protect any removed vehicle components.
- Ensure all discarded recyclables (vehicle accessory components and packaging) follow local recycling regulations.
- Ensure all bare metal surfaces are protected using Automotive Bare Metal Primer and touch-up paint.
- Remove all metal swarf and dust from all vehicle surfaces if surface is used for accessory installation.

Tools Required

- Ratchet
- Socket Set 10mm, 13mm, 17mm, 19mm
- Torque Wrench 11Nm - 130Nm
- Metric Spanner Set
- Socket Extension
- Cutting Knife
- Metal Primer

Safety Notes

- Check Tow bar Compliance Plate, Tongue Label and ADR Label to ensure correct Part numbers:
  - Tow Bar P/No: PZQ6448061,
  - Tongue P/No: PZQ6348065,
  - ADR Label
- Check that all work practices comply with safety standards.
- Please wear appropriate clothing and use safety equipment.
### Tow Bar Kit

**TOWBAR INFORMATION**

TOYOTA
FOR TRAILER TOWING ONLY
TOWBAR PART No: PZQ6448061
TONGUE PART No: PZQ6348065
LDH PART No: PZQ6248060
MAX. TOWBAR CAPACITY: 2000 KG
MAX TOWBALL DOWNLOAD 200KG

**NOTICE**

WHEN RAISING THE SPARE WHEEL, PUSH THE REAR OF THE SPARE DOWN THEN FORWARD, SO THAT THE REAR OF THE SPARE MAINTAINS CLEARANCE TO THE TOWBAR.

**Step 1**

*Important*

Always refer to the vehicle’s Workshop Manual when removing vehicle components.

- Remove both the RHS and LHS undercovers (1).
  - LHS - screws x3, clips x3, nuts x2 (use a 13mm socket).
  - RHS - screws x3, clip x1 and nut x1.
- Remove the OE undercover bracket (2) RHS (use 10 and 17mm sockets). Discard the bracket.
- Remove the OE lower garnish (3) from the rear bumper (4):
  - Remove the clips x5, bolt x1 (use a 10mm socket) and discard.
  - Remove the garnish - To remove the garnish push the top end of the garnish in and at the same time pull the bottom end of the garnish out. Start removing from left to right.
- Retain all plastic clips and fasteners for future use unless otherwise specified.

---

**Step 2**

- Remove the rear LHS & RHS tie down hooks (1) and retaining bolts (use M17 socket) from underneath the vehicle and discard.

---

**Step 3**

- Remove the vehicle grommets (1) and the plugs (2) from the RHS & LHS chassis rails.
  - LHS - 3 plastic plugs + 2 rubber grommets (shown).
  - RHS - 2 plastic plugs + 2 rubber grommets (not shown).
- **Step 4**

  - Remove the body sealer as shown in diagram (A).
  - Coat any bare metal exposed when removing the body sealer with zinc rich metal primer.

  **Important** Take care, the chassis may be damaged if too much body sealant is removed.

- **Step 5**

  - Lower the spare wheel to allow Tow Bar Fitment.
  - Clean the area (2) with isopropyl alcohol or similar.
  - Apply adhesive notice label for spare tyre (1) into the vehicle tool compartment area located in the rear cabin onto the area shown (2) in the diagram.

- **Step 6**

  - Fit the Garnish (1) onto the rear bumper fascia (2) and secure with the supplied clips x2 (1 on each side) (3).
— Step 7 —

- Raise the tow bar (1) into position and loosely hand tighten the M12 Hex Bolts x6 (2), use 6x M12 x black washers 30x13.5x4.0 (3).

Caution: Use the correct washers to tighten up the tow bar.

— Step 8 —

- Fit the LHS side plate (1) into position and loosely tighten the M12 Hex Bolt x5 (2), M12 Flat silver washer x2 (6), M12 Black washer x3 (3) and the M12 Flanged Nut x3 (4) to the chassis rail holes and the tow bar (5) as shown. Refer to diagram.

Note: Use Silver Washers (24x13.5x4.0) with the LH Plate. Repeat for the RH Plate, using M12 Black Washers only (30x13.5x4.0).

— Step 9 —

- Once all fasteners have been located in place on the towbar (1) and side plates (2), tighten all fasteners so the towbar and side plates are flush with the vehicle body.
- Torque the M12 fasteners to 130Nm.
- Raise the spare wheel (3) and push it towards the front of the vehicle to maximise the gap to towbar.

Caution: Make sure the spare wheel is installed in the correct position.
**Step 10**

- Fit the Trailer Wiring Harness.

---

**Step 11**

- Secure the Towbar Garnish (1) lower end to the Tow Bar with scrivets (2).

**Important**

Tongue to be installed in up position only.

---

**Step 12**

- Attach the tow bar tongue (1) to the tow bar (2). By locating the locking pin (3) through the tow bar and secure it with the M16 Nut (4) and R Clip (5).
**Step 13**

- If the Tongue (1) is installed but not towing, fit the M10x35x1.5 Anti-Rattle Bolt (2) and M10x1.5 Locking Nut (3).
- Fasten the supplied M10 Anti-Rattle Bolt (2) to remove any free play and rattle and tighten Lock Nut (3).

**Important**

Anti-Rattle Bolt (2) and Lock Nut (3) should only be used when not towing to remove free play and rattle.

**Step 14**

Mark up the vehicle LHS undercover section (1) and section (2) and cut out the marked areas.

**Step 15**

- Mark up the vehicle RHS undercover section (1) and section (2) and cut out the marked areas.
Step 16
- Preassemble loosely the bracket (3) to the undercover as shown on diagram (A) using M6 x 25 Bolt (1) and Washer (2).
- Reinstall the vehicle RHS undercover (3) to the vehicle using the original fasteners.
- Assembly bracket (3) to Tow Bar as shown on diagram (B) using the M6 Bolt and Washer (1)&(2).
- Tighten up the bolts. Required torque 11 Nm.

Step 18
- Attach the ADR Label (1) to the driver’s door as shown.

Place the Fitting Instructions in the glove box after installation is completed.
