

SO SIMPLE, YOU COULD DO IT WITH YOUR EYES CLOSED.

To use, simply pour the product into a full tank of fuel[†]. It's that simple. You can ask your Service Advisor to add it during your next service or you can take a bottle home and pour it into your tank next time you fill up.

MADE BY TOYOTA FOR TOYOTA.

Toyota Genuine Injector Cleaners are designed specifically for use on Toyota's, ensuring you are getting the very best product for your vehicle.

HOW OFTEN SHOULD IT BE USED?

To maintain optimal performance, it is recommended that Toyota Genuine Injector Cleaner be used once every 2 years or 40,000kms or may be used as required to help restore engine performance.

FEEL THE DIFFERENCE IMMEDIATELY.

The best part about using Toyota Genuine Injector Cleaner is that you'll experience the benefits almost immediately. After just one tank you should start feeling a difference[‡]. And all for a relatively small cost!

To purchase a bottle of Toyota Genuine Injector Cleaner, simply ask your Service Advisor at your next service.

Please note these changes are not improving the car beyond its original specs but helping to restore the vehicle to its original design condition, with regard to the vehicles overall mechanical condition consistent with the age and kilometres travelled. Due to the nature of some deposits it may not be possible to remove these completely. [†] Adding to a full tank ensures optimal detergency performance. It is not recommended using Toyota Genuine Injector Cleaner when your vehicle has under ¼ tank of petrol.

oh what a feeling!

IT MAY LOOK CLEAN ON THE OUTSIDE...

...but on the inside deposits can build up on fuel injectors causing a reduction in performance. Ensure your engine remains in peak condition by using Toyota Genuine Injector Cleaner.

GET YOUR NEW CAR PERFORMANCE BACK.

Over time deposits can build up on fuel injectors and intake valves causing issues such as reduced engine power, poor fuel economy and increased emissions. Toyota Genuine Injector Cleaner can rapidly penetrate these deposits, breaking them down so they can be dissolved into the fuel and burnt as part of the combustion process. This can restore your engine to its new car performance.

WE'VE GOT ALL ENGINES COVERED.

Toyota Genuine Injector Cleaners are available for both petrol and diesel engines.

TOYOTA GENUINE PETROL INJECTOR CLEANER.

Designed specifically for Toyota petrol engines, Toyota Genuine Petrol Injector Cleaner removes deposits from injector nozzles, intake valves, spark plugs and combustion chambers so they can work as they were originally designed and avoid issues of poor combustion and misfiring.

TOYOTA GENUINE DIESEL INJECTOR CLEANER.

Designed specifically for Toyota diesel engines (including common-rail engines), Toyota Genuine Diesel Injector Cleaner works by removing carbon deposits from fuel injector nozzles so they can spray fuel cleanly and evenly once again.

Petrol vehicle
use only.

Diesel vehicle
use only.

BENEFITS OF USING TOYOTA GENUINE INJECTOR CLEANER.

Improves engine idling

Restores engine power

Restores fuel economy

Reduces engine hesitation

Reduces engine knocking

Reduces engine vibration

Reduces emissions

Reduces engine noise
