

## **Lower Trailing Arm Bushes**

**To Suit: Nissan Pintara R31 1987-1990**

**Nissan Skyline R31 1987-1990**

The Original Equipment arm has an outer steel shell into which is pressed the steel shelled bush.

Care must be taken when replacing these bushes to leave the outer shell (with the shoulder) in the arm.

The new replacement bush presses into this original outer shell, with the thicker flange facing the out board side of the trailing arm.
