

Fitting Instructions #5302IS

Ford Ranger PX3

Front Spring Seat Upper Bush kit

Note: Polyurethane spring seat upper bushings must be fitted to both sides of the vehicle.

1. Support the vehicle on jack stands/hoist and remove the front wheels.
2. Remove the front upper arm outer nut (ball joint side) from the steering knuckle.
3. Remove the front strut assembly from the vehicle.
4. Note the orientation of the top strut mount.
5. With the aid of a spring compressor disassemble the strut and separate the top strut mount assembly.
6. Clean up contact areas and replace the spring seat upper bush.
7. Reassemble the top mount assembly in reverse order, ensure it is orientated as per original.
8. Refit the completed front strut assembly into the vehicle.
9. Tighten all fasteners to manufacturer's torque settings and carry out a wheel alignment.
