

Fitting Instructions #4736S

Ford Mustang

Rear Control Arm Lower Inner Front Bushing

Note: Polyurethane bushings must be fitted to both sides of the vehicle.

- Wheel-align the vehicle before the job is started and note settings;
- Jack the vehicle up and support on jack stands/hoist and remove the rear lower control arm;
- Remove original shell parts from the housing with the use of a hydraulic press and suitable pressing tools;

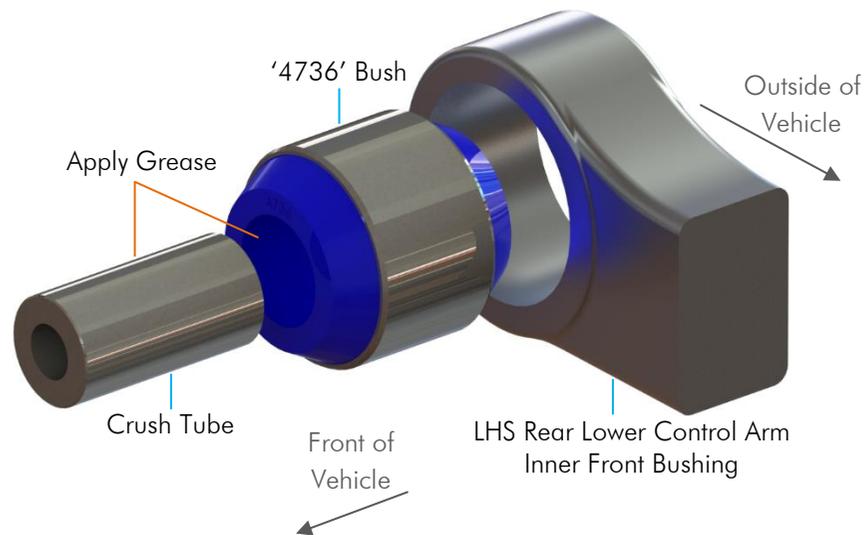

Figure 02 – '4736' bushing installation

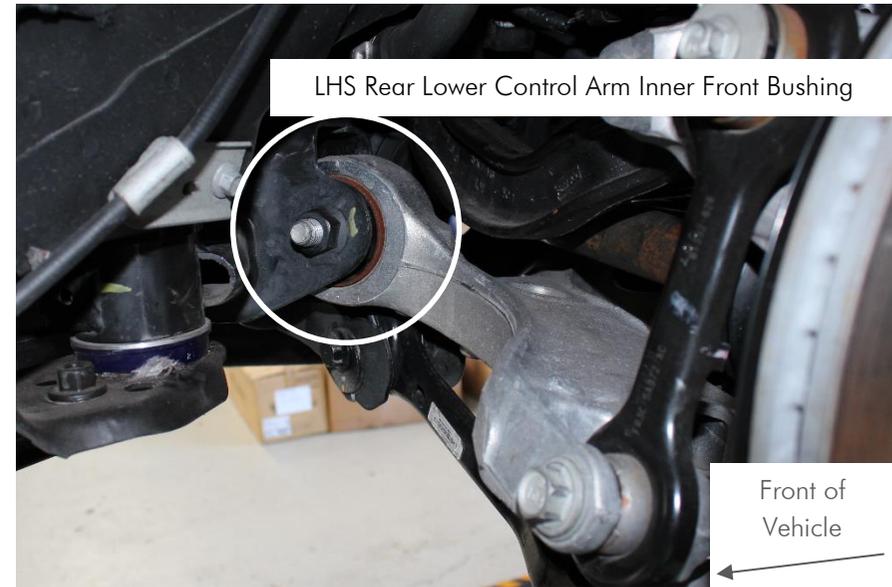

Figure 01 – Left Hand Side Lower Control Arm Inner Front bushing

- Press the '4736' bush into the housing until the shell is flush to the surface of the arm;
- Generously lubricate the outside of the crush tube and inside of the bush, then push the crush tube in the bush;
- Repeat the procedure for the other rear lower control arm;
- Refit the control arms to the vehicle and tighten all bolts to manufacture's torque settings and carry out wheel alignment.
