

Fitting Instructions #TRC471IS

Toyota Hilux KUN26

Adjustable Camber Lower Control Arm

As viewed from the rear of Right Hand Side	
TRC471K - Standard	TRC472K - Negative Camber Increased for Raised Vehicles
	<p>Gives 0.6 degree camber change with maximum offset</p>

NOTE: These components must be fitted by qualified persons only, to factory specifications, as per factory service manual.

1. Before beginning any alignment work, always check for loose or worn parts, proper tyre pressures, and odd tyre wear patterns. Replace any loose or worn parts before setting alignment;
2. Raise vehicle by the chassis and support with jack stands. Remove front tyre and wheel assemblies;
3. Remove the factory front lower control arms and clean the chassis area.
4. Install the control arms to the vehicle;

5. Use the supplied camber pins, shank coated with anti-seize, to tighten the arm onto the chassis (see camber bolt diagram for correct installation) but reuse the factory bolt for the ball joint bracket;
6. Re-install the tyre and wheel assembly. Lower the vehicle and take alignment readings. Adjust the camber pins to achieve the desired setting;
7. When final caster/camber settings are achieved, torque the camber pins assembly to 140 Nm and road test the vehicle.
