

Fitting Instructions #5717IS

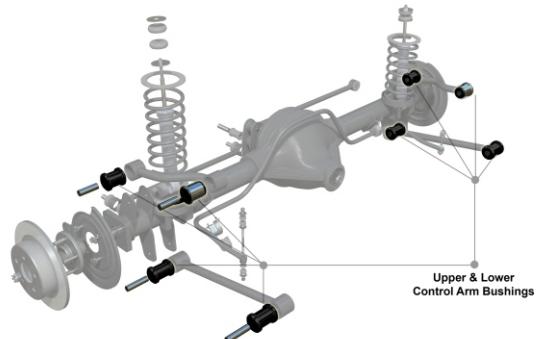

LDV D90 2017-on

Upper Trailing Arm Bushings

Superpro
Suspension Parts

This bushing kit includes the following:

- Bushing 5717 x4
- Steel tube 24x14.3x52mm x4
- Grease

NOTE: These components must be fitted by qualified persons only, to factory specifications, as per the factory service manual. Photos are an indication and may vary slightly in appearance from the actual product.

- Raise vehicle evenly and safely support.
Never rely on a jack only
- Proceed to remove rear wheels for better access.
- Next, start by un-bolting 1 trailing from the vehicle only.

Note: if required, disconnect head-light sensor. Refer RH image. Careful not to damage the plastic lever. Refer page 2 for sensor re-positioning.

- Note the original bushing is pressed in the forged arm centrally. Note approx 10mm a side.
- Proceed to press bushing out (including steel outer shell).

Refer page 2

Lower Trailing Arm Bushings

Superpro
Suspension Parts

Continued - Page 2

- Once old bushings have been removed, clean the arm of any dirt, grease or burrs.
- Push new bushing **5717** into upper trailing arm. Using a small amount of grease on the shell can help with shell pressing. Remove excess grease after.

Pressing old bushing out:

Pressing new bushing in:

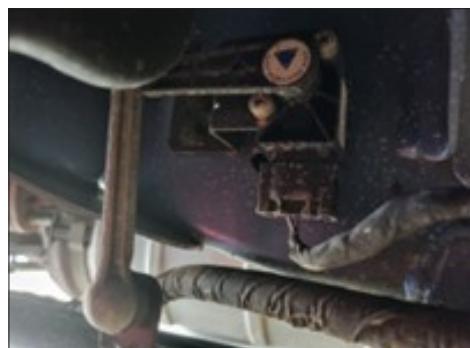

- Grease bushing internal diameter and side face with supplied grease only. next push in supplied steel tubes.
- Re-fit arm to vehicle using original bolts.

IMPORTANT: Check Head-light sensor position is correct. After removal of rear suspension items, the sensor may alter position and cause an incorrect headlight angle. Refer below images of INCORRECT and CORRECT position.

Incorrect Position

Correct Position (vertical)

- Test drive vehicle, re-check all bolts.
- Re-check all bolts after 500kms
