

Fitting Instructions #4845IS

Mitsubishi Colt Z37A Chassis Code- 2006-on

Engine Roll Stopper Bushing

- Jack the vehicle up and support on jack stands/hoist;
- Using factory manual as a guide, remove the engine roll stopper from the vehicle;
- Using a press remove original bushings including the steel shells from the housing and clean up bores as necessary.
- *For part number 522 Cotton real bush:* Apply the grease supplied to the body of the bush and the inside of the housing using an Arbor press or similar press into housing. Lubricate the bore of the installed bush and outside surface of the crush tube and using an Arbor press or similar press the crush tube into the bush.
- *For Part number 4014 bush:* Press the polyurethane steel shell part into the housing with a hydraulic press. Lubricate the outside of the steel tube and the bore of the newly installed polyurethane Bush and using Arbor press or similar push the steel crush tube into the bush.
- Refit the engine roll stopper to the car, making sure you tighten the bolts to manufacturer's specification.
