Suzuki Swift Mk1 / Mk2

Steering Rack & Pinion Mount Bushing

Fitting Instructions #4488IS

Suzuki Swift Mk1 / Mk2

Steering Rack & Pinion Mount Bushing

- With the vehicle on jack stands/hoist, remove the steering rack and cross member mount bolts, then disconnect ball joints;
- On the passenger's side, remove the bracket, cut the boot's zip-ties and remove the boot, then pull out the original rubber bush and slide up the new '4488' SuperPro polyurethane bush onto the rack. Once the '4488' bush is placed on the rack, install the boot again and zip-tie it;
- On the driver's side, remove the bracket and the original bush and install the new '0223' SuperPro bush, then refit the bracket;
- Refit steering rack mounting bracket and cross member ensuring all mounting bolts and nuts are tighten up to the manufacture's torque specifications;
- Wheel-align vehicle to ensure correct alignment.
