

Fitting Instructions #4571IS

Chevrolet Silverado

Leaf Spring Rear Bushing

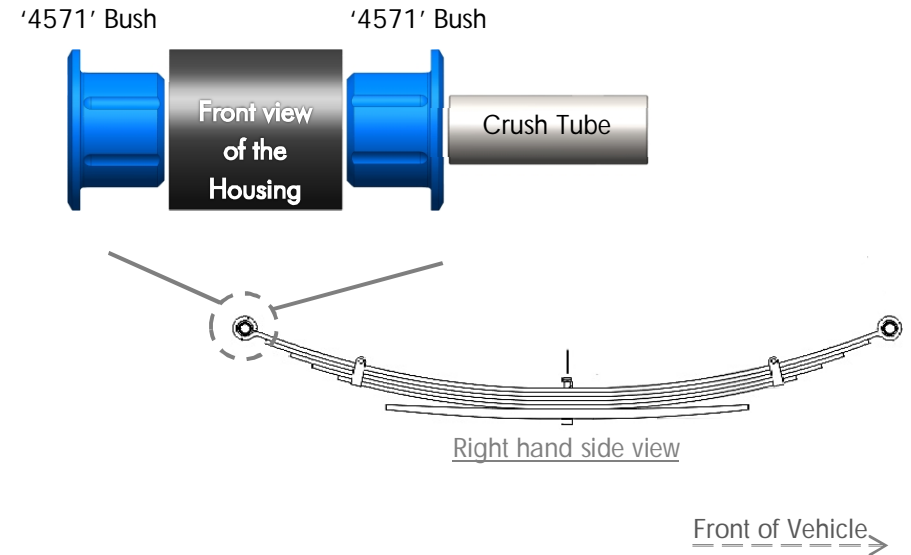

- Jack the vehicle up and support on stands/hoist;
- Remove the leaf springs from the vehicle;
- Remove original bushes from the leaf spring housings with the use of a hydraulic press and suitable pressing tools;
- Remove any old original bushing materials before installing new bushes. Then apply the grease supplied into the housing and on the outside surface of the bush, and push the new bushes in;
- Refit the leaf springs to the vehicle;
- Tighten all bolts ensuring that you use manufacturer's torque settings and carry out wheel alignment.
