

Fitting Instructions #2701IS

Subaru WRX GD

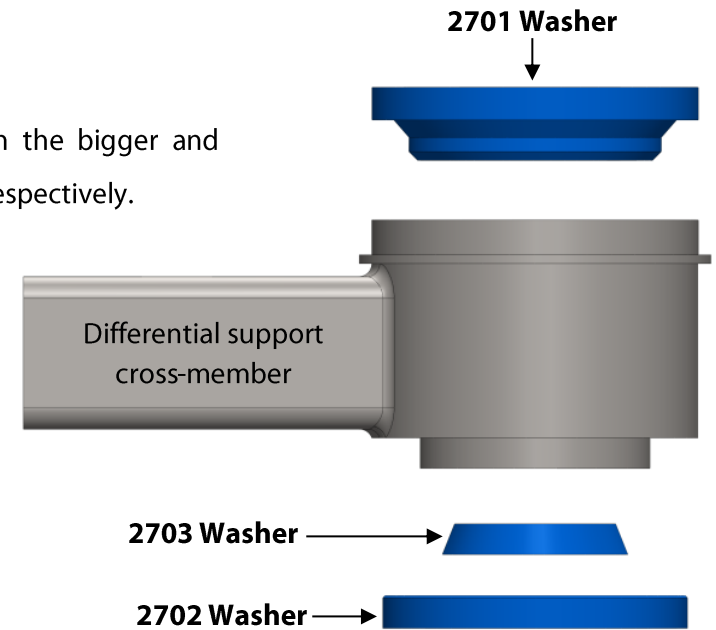

Cross-member Supplement Washers

1. With the vehicle on jack stands/hoist, support the differential support cross-member using a suitable jack;
2. Remove the bolt of the differential support cross-member bush and loosen the two smaller bolts of the support bracket;
3. Lower the differential support cross-member only enough to fit the 2701 bush insert on the top of the original bush;

4. Fit the 2702 and 2703 washers in the bigger and smaller voids of the original bush, respectively.

5. Refit the differential support cross-member bush bolt;
6. Tighten all bolts to the manufacturers torque specifications.
