

Fitting Instructions #2774IS

Mitsubishi Pajero NM - NP

Front Lower Control Arm Inner Bushes

The original bush outer metal shell must be removed for the fitment of this kit.

Ensure that the grease supplied is used on all mating steel surfaces during assembly.

Please Note: The front and rear bushings in the control arm have different flange thicknesses, please be careful to make sure:

- #2774 is fitted to the front eye, with the larger diameter, narrow flange and metal washer positioned toward the front;
- #2775 is fitted to the rear eye, with the large diameter, wide flange and metal washer positioned towards the rear.
