## FEATURES & BENEFITS OF AIR SUSPENSION

**SIMPLE TO FIT**  
EASY TO USE

**ELIMINATE**  
SPRING SAG

**SAFER**  
LOAD CARRYING

**STABILISE**  
BODY ROLL

**MAINTENANCE**  
COSTS LOWERED

**EXCELLENT**  
RIDE QUALITY

**PREVENTS**  
BOTTOMING OUT

**ADJUSTABLE**  
LEVELLING CONTROL

**IMPROVES**  
STEERING & BRAKING

**REDUCES**  
TYRE WEAR

## EASY LEVELLING SOLUTION WHEN TOWING OR CARRYING LOAD

Airbags allow you to lift & level up a sagging rear end when carrying extra or uneven loads, or when towing trailers.

Airbags provide the additional support needed for more comfortable, safe & economical driving.

## HOW DO I INFLATE MY AIRBAGS?

Each kit comes with manual inflation valves allowing you to inflate & deflate your airbags using a portable compressor, hand pump or service station air pump.

## ONBOARD AIR CONTROL SYSTEMS

Airbag Man has a large range of optional onboard air control kits, which allow for quick inflation & deflation of your airbags. These add-ons include digital gauges, air tanks, compressors, pneumatic switches, wireless control, automatic levelling, tyre inflation facilities & more.

## WHERE CAN I BUY?

Contact our friendly Sales team to discuss options for supply or fitment with a local Airbag Man specialist.
