

Fitting Instructions #Z7070-W

Suzuki Jimny 2018 onwards 3 Door and 2023 onwards 5 Door
Rear Radius Arms – Pinion angle correction

Kit Contains: 2 x complete radius arms with installed bushings

Important – it is safest and easiest to replace 1 arm only at a time

This is best performed on the ground or on a 4 Post hoist with the wheels on.

Important make sure the vehicle is secure from rolling

1. Recommend using wheel chocks to chock the side of the vehicle that is not being worked on.
2. Working on one side at a time remove the nut that attaches the handbrake cable bracket to the top of the radius arm and set aside.
3. Remove the 2 bolts that attach the radius arm to the differential.
4. Remove the front bolt that attaches the arm to the chassis.
5. The radius arm should be free to be removed from the vehicle

6. Install KTA490 radius arm and reusing all fasteners bolt the arm in place.
7. Re attach the handbrake cable bracket to the stud on top of the arm.
- 8. Installation is now complete for this hand**
9. Repeat procedure for the other hand and once complete tension all fasteners
10. Check vehicle wheel alignment and adjust if necessary
11. Check all fasteners at 1000 km
