

Installation Guide

STEERING RACK MOUNT BUSHING

PAGE 1 of 1

(Always refer to the current catalogue for complete application listings)

N.B: This installation guide should be used in conjunction with the workshop manual.

Kit Contents:

- 1 x 1095B Bushing.
- 1 x 1099 Bushing 25mm (1")
- 1 x 1095A Bushing 30mm (1.18")
- 1 x Install Guide.

Important Note:

This kit is supplied with two different sized bushing widths to accommodate the two different steering rack mounting brackets that can be found on the Subaru models. Only one of the bushings will be required to be installed and the other discarded.

Measure the removed steering rack mounting bracket width with a ruler and use the corresponding supplied bushing to suit, this will either be 25mm (1") wide or 30mm (1.18") wide. Alternatively the bracket can be placed over the bushing and the bracket will fit snug into the bushing.

Failure to use the correct mounting size will result in excessive sideways play in the steering rack.
