

SAVE UP TO TWO
HOURS WITH
OUR NEW SPLIT
BOOT KIT.

The thinking behind Toyota's innovative Split Boot Kit is so simple you'll wonder why no-one's ever thought of it before. Rather than having to remove an entire drive shaft to replace a worn boot kit, the Toyota Genuine Split Boot Kit makes preventative maintenance so much easier. It simply fits around the drive shaft and is then firmly sealed with an ingenious snap-fit connection. And since you can do so in less than 30 minutes, you will have more time to service and repair even more vehicles.

THINK OF THE BENEFITS:

- Split Boot Kits are competitively priced.
- Your customers will be happier because they won't be inconvenienced by having their cars off the road for lengthy periods of time.
- And better still, the "93 Point Inspection" featuring CV joint inspection will help you raise customer awareness of preventative maintenance.

But saving time doesn't mean sacrificing quality. These Split Boot Kits are as thick as the original Toyota Genuine Boot so they're equally durable and puncture resistant.

FITTING A SPLIT BOOT KIT IS EASY. HERE ARE SOME HELPFUL HINTS TO GET YOU STARTED:

- Once all the excess grease from the old boot is removed, use the grease shield provided as part of the SBK packaging.
- Apply the lubricant provided to the groove side of the boot split.
- Always start at the large end of the SBK when joining the split.
- Always test the joint after connection by pulling apart to ensure correct joining.
- Fasten the small end of the boot to the shaft with the clamp provided before applying the grease provided.
- Always apply the fastening side of the clamps 180 degrees from the boot split joint.

So next time you need to replace a worn boot kit, use the Toyota Genuine Split Boot Kit and reap the benefits.

SPLIT BOOT KIT VEHICLE APPLICABILITY GUIDE As at March 2010			
MAIN MODELS	MODEL CODE	PRODUCTION	MVP No
AVALON	MCX10	April 2000 - Jun 2006	04438-YZZ19

*04438-YZZ19 will not fit the SXV20 if the Genuine replacement outer joint has been fitted.

Please note: As the Split Boot Kit is a preventative maintenance part and not an original equipment replacement part, it cannot be fitted and used without affecting the manufacturer's new vehicle warranty. All Toyota Genuine Parts do however carry a 12 month (unlimited kilometres) Toyota warranty against manufacturing defects.
